Dr Shreemathi S Mayya:

We look forward for collaborating with researchers across the globe who are interested in tool development, inter- disciplinary research and areas relating to education. We may provide support for designing the study, methodology and data analysis for any of the interdisciplinary areas. We are familiar with the software SPSS and R based software-*jamovi* for data analysis. Author has contributed to more than 80 publications in health science. Interested collaborators may contact at shreemathi.mayya@manipal.edu
