---

In recent years, the Government of India (GoI), through the Central Drugs Standard Control Organization (CDSCO) office (the national regulatory authority), has been actively engaging with the drug industry and associated stakeholders through its inclusive approach for instituting measures in helping to remove regulatory bottlenecks. The CDSCO has undertaken a slew of reforms by amending, upgrading and optimizing the regulatory requirements and policies with a view to encourage companies undertaking basic research, preclinical studies, clinical trials (CTs) and commercial manufacturing in India. They have also rationalized and simplified various formats of applications and made quite a few submissions and their processing online. These reforms which have been well received by the pharmaceutical industry, academia and other stakeholders are expected to instill much needed confidence for resurrecting the Indian pharmaceutical and biotech industry and bring about effective transformation while stressing on improving product quality standards.
